

Retain Seating & Cargo Space

Transport a scooter or powerchair while keeping seating and cargo space open with Bruno's Out-Sider®. Featuring an adaptable platform, the Out-Sider can be adjusted to accommodate a mobility device or vehicle change in the future. Add the popular "Swing-Away" option to access the cargo area while the lift is installed.

Simple. Press a button to lower the self-leveling platform. Drive the mobility device onto the platform and press a button to raise the lift into place.

Secure. Device-specific securements lock scooters or powerchairs in place. Unique safety system prevents unintentional lowering of the platform.

Safe. Maintain rear visibility thanks to the Out-Sider's low-profile design and adjustable license plate holder.

Space-efficient. Automatically folding platform streamlines Out-Sider when a mobility device is not present.

Adaptable. Reinstall in another applicable vehicle or adjust to accommodate a new mobility device.

Lifting Capacity
350 lb (159 kg)

Vehicles
SUVs, Vans, Pickups, Cars
